The plot of the book itself is pretty basic and straightforward. Tech geek Nora has landed a summer program where she can try out her coding skills at an elite school, but when a fellow student goes missing, she herself is the one suspected. Nora as a character was interesting, but the whole thing of the geeky character who is awkward and unpopular with boys suddenly attracting who is supposedly the most attractive person around is kind of an overdone and not particularly believable idea. That's not to say that socially awkward people can't fall in love in books or anything, but going by the character's general behaviour, mannerisms and interests, she didn't have a lot in common with Maddox beyond their shared work (never mind the fact that they fall in love in a matter of weeks). I personally also found the modern slang and catchphrases a little annoying and unrealistic (it consists of the words that used to be embroidered on the 50% off sale sweaters at Forever 21 here in Halifax before it went bankrupt last month), but that's just a personal preference. To me, it gives books a very dated feeling in that it traps them in fads and trends that quickly fade out in a matter of months. Still, overall I really enjoyed the story, and it was surprising to see how it progressed.

When I saw that A.V. Geiger wrote a new book, I had to read it. I loved the Follow Me Back books, full of open-mouthed twists and turns. Scared Little Rabbits is like that, too!

Even if I had difficulty believing in the student's disappearance for a bit, when everything unfolded, I was blindsided by all the twists (in a good way) to doubt it anymore. I was completely glued to the pages, wanting to know more and more until the end.

Many thanks to Sourcebook Fire for the complimentary e-copy of

Full of twists and turns and a cast of characters brimming with secrets, this YA thriller will keep readers on the edge of their seats from the second they crack the cover!

I love a good boarding school mystery, and A.V. Geiger has set this one in such a fascinating setting. The school is full of technology that's believable yet absolutely enchanting. I wanted to enroll in Winthrop Academy right alongside Nora.

I love a good boarding school mystery, and A.V. Geiger has set this one in such a fascinating setting. The school is full of technology that's believable yet absolutely enchanting. I wanted to enroll in Winthrop Academy right alongside Nora.

The mystery was compelling from the very first page, and Geiger did a great job laying the groundwork for the big twist, but at the same time, I still didn't see it coming. It was fast-paced and just so much fun!

While Nora was incredibly likable and relateable, the rest of the cast was totally unreliable and hiding some big secrets, which made them fascinating to read about and added some fun layers to the mystery. Geiger wove the big reveals throughout the plot seamlessly and in a way that kept me glued to those pages. I'm so excited to see what she has up her sleeve for us next!
