This book was like getting to sit around with all of the stars of The Office and hearing about their first impressions of the show, their anxieties as they filmed and how they felt about those last two seasons.

It was interesting to learn who else auditioned for the show, why certain actors were selected and how decisions were made each season.

I loved it as much as I love bears, beets and Battlestar Galactica!

Reading this book felt like I was getting to hang out with my friends again. Greene pulled together hours of interviews from the cast members, writers, directors and producers that gave us an in-depth look into what it was like working with the cast and crew. We got a look into how they went about casting, getting NBC to buy the show and the highs and lows of each season.

If you are a fan of The Office is HIGHLY recommend this. A MUST read.

I received a copy of this title via NetGalley. It does not impact my review.

The Office is one of my all time favorite tv shows. I can't even tell you how many times I have binged it (though I often skip those last two dumpster fire seasons after Steve Carell left). When I saw this book, I knew I had to read it. I was hoping for lots of behind the scenes trivia and maybe some juicy scandal, but it wasn't quite what I expected.

When I saw this book, I knew I had to read it. I was hoping for lots of behind the scenes trivia and maybe some juicy scandal, but it wasn't quite what I expected.

The format of the book is mostly excerpts from interviews from people involved with the show "â€“

ranging anywhere from cast and crew to Scranton Chamber of Commerce employees. The author did a lot of interviews with these people, but he also utilized other published interviews, quotes from dvd commentary, etc. to fill things in. The quotes are arranged in a way that almost feels like a conversation, but there were often times where it was just quote after quote basically saying the same thing (i.e. everyone commenting on what a hard worker Steve Carell is or how Greg Daniels [the man responsible for adapting The Office from the UK] was the best). It didn't always work for me and there were a few times where I skimmed through it. Most of the quotes were also from writers, producers, or less central cast members, so I wasn't always hearing from the people I wanted to the most.

Here are a few things I learned that stood out to me:

I've heard it said numerous times that the Chili's Manager in The Dundies episode that bans Pam from the restaurant for being drunk was an actual Chili's manager, but that's not true. He was an actor. They weren't even filming in an actual Chili's, they had just worked with the restaurant chain to bring in fixtures, etc.

Instead of the big dance number at Jim and Pam's wedding, the original script had Roy riding in on a white horse to try to stop the wedding. Then Dwight takes the horse to Niagara Falls and it was going to fall down them. Greg Daniels was apparently the only one who liked this idea and there were a lot of fights about it before the idea was finally scrapped.

Supposedly, Steve Carell wanted his contract to be renewed after the seventh season, but there was change in leadership at the network that wasn't a big fan of the show and they didn't try to make any deals about paying him more money, so he left.

Thank you NetGalley for providing me with a digital arc of this book. When it comes out I will definitely be purchasing a final copy. If you're a big fan of the office, then you'll love this book. then there are chapters on notable episodes within each season. There is so much behind the scenes information in this book. I absolutely loved it and can't wait to get my hands on the final copy. I wish that someone would do this same book concept but for the Television show Parks and Recreation. I guess if no one else will then I might have to do it.

Of course the show is better, still interesting nonetheless.
